

Date: April 8, 2019

RoHS Compliance

Restriction of Hazardous Substances, known as Directive 2002/95/EC (RoHS 1), was adopted by the European Union in February of 2003 and took effect on July 1, 2006.

2011/65/EU (RoHS 2) took effect on January 2, 2013.

2015/863/EU (RoHS 3) adds four new substances and is effective on July 22, 2019.

Advanced Laser manufactures many products from multiple sources. Advanced Laser orders these products to be RoHS compliant as required, identifies them in our ERP system and segregates them in our inventory. Advanced Laser monitors the status of the directive as well as statements from our suppliers, should any relevant changes occur that require further action, Advanced Laser will provide the appropriate notification to our customer base.

A handwritten signature in blue ink, appearing to read "Austin Miland".
